

# Reports of Serious Adverse Events After Covid Vaccination in the Frum/Dati Community

## Deaths

### Covid vaccine injuries and deaths *are* real

Many people don't know anyone who passed away from or was injured by a Covid vaccine; rabbanim have even put out videos urging their communities and the larger public to get vaccinated based on a belief that the vaccines are perfectly safe and no one has ever been harmed or injured by them. Therefore, in an effort to save *klal Yisrael* from further harm, we have compiled a list of people in the frum communities who have been injured or died from the vaccine, as well as those in the wider Israeli population. While we can't say for sure that every injury or death was caused by the vaccine, there are too many similar reports post vaccine for them all to be coincidences.

Some of the information about death and or injury after vaccination was provided to us by sources wishing to remain anonymous and/or retain the privacy of their friends and family members.

If you have any reports of injuries and/or deaths to include in this list, please email [rodefshalom613@gmail.com](mailto:rodefshalom613@gmail.com) with the subject "Covid vaccine adverse events".

*I am very interested to know how the people who hang on to "Science" would react if they heard, like me, from a direct and unequivocal report that a 13-year-old boy in the north of the country, completely healthy, died, at home, a month after the injections.*

*I am very interested to know why the medical system is hiding this story and I am sure there are more stories.*

*After all, science is based on observations and the study of truth.*

*But what happens when the truth is no longer part of the same "science"?*
